## **Microsoft Software Contract Added to Suite of EdBuy Offerings**

# *Procurement Bulletin*

June 20, 2005

#5-03

*California County Superintendents Educational Services Association*

## **1.1 Subject**

### **Statewide Piggybackable Contract for Microsoft Software Licenses**

## **1.2 Summary**

The Kern County Superintendent of Schools has awarded a competitively bid contract for Microsoft Computer Software licenses that beats existing benchmark prices in California for some of the most popular Microsoft products.

The award was made in December 2004, and was adopted into the suite of EdBuy contracts in June of 2005 because the pricing was determined to provide the best value to California schools from among available piggybackable contracts for Microsoft.

The awarded vendor is Digital Information Services, doing business as Computer Intelligence Association, of Potomac, Maryland.

All school districts and county offices of education are eligible to use the contract and are specifically identified as potential users in the bid documents.

## **1.3 Commodity Overview**

Microsoft uses dealers and resellers as the distribution channel for its products. Thus, there is competitive pressure among resellers to provide best pricing for already low-priced academic and education licensing. Microsoft controls the types of licenses available, plus the scope and language of licensing. The purchase of a license constitutes an agreement between the education agency and Microsoft, not the reseller. The payment of a license fee gives the buying education agency the right to use a specific Microsoft application or operating system. Software is always licensed – never owned by the buying agency. Microsoft offers different types of licenses for the same product. The EdBuy contract offers the Open License type of product.

As with competing contracts, there is an additional fee if a CD or media copy of the application is required by the buying agency. Another additional fee is necessary to secure any manuals or hardcopy documentation.

## **1.4 Key Terms and Conditions**

- License type is the Microsoft Open Licensing Program.
- Under the Open Licensing Program, an Academic client may purchase licenses as they need without having to sign an enrollment form or

## Procurement Bulletin 05-03

---

making any additional commitments. Other licensing programs require enrollments for each site that wishes to purchase licenses.

- Under the Open Licensing Program, licenses procured for use at the school may be used free at home by school personnel.
- Under the Open License Program, upgrades are guaranteed for a full (2) years. Other license programs such as Microsoft Select, have a termination date corresponding with an arbitrary license expiration date. The result is that upgrade protection plans expire in less than (2) years.
- The purchasing contract and pricing through Kern County Superintendent of Schools is valid through December 31, 2005, but it has a clause for an extension at the option of the Superintendent of Schools.
- A purchase gives a buying agency a valid license; additional fees are necessary for media or documentation.
- All software published and manufactured by Microsoft is eligible to be sold under the Kern contract; only the most frequently purchased items are listed on EdBuy; for other products, contact the vendor.
- Evaluation for award of the bid was based on the effective price offered by bidders and awarded to the low bidder. Pricing is based on a formula and may increase or decrease during the term of the contract, depending on market conditions corresponding to a change in the Microsoft list price or vendor's cost basis from Microsoft.

### 1.5 Benchmark Pricing

EdBuy reviewed the prices for 773 types of licenses offered by the Kern contract and 840 offered under a separate contract promoted by the CalSave program of Monterey County. For the majority of SKUs (stock keeping units, each with a unique number), each contract is offering a different type of license, and not all items are comparable. However, the EdBuy analysis identified 279 common SKUs offered by both, and the Kern contract pricing was 14.94 percent lower on the common SKUs.

In addition, the EdBuy analysis looked at the five most commonly purchased Microsoft applications, regardless of license type, and found the Kern contract lower on all five.

### Procurement Bulletin 05-03

Here are the five most common products offered and the comparative prices. Media prices are the same for each contract.

Microsoft Product	Kern	Benchmark
Office Pro 2003 License	\$49.61	\$49.80
Word 2003 License	\$27.35	\$27.39
Windows XP Pro Upgrade License	\$51.94	\$52.29
Windows Server 2003 License	\$94.45	\$94.62
Windows 2003 Client Access License	\$5.69	\$5.81

### 1.6 Total Cost of Ownership

Districts should consider total cost of ownership in determining the value of contract pricing. Factors which add to total cost of ownership when using contracts include costs of:

- Newspaper advertising
- Bidding and quoting
- Media (CDs)
- Work at home rights
- Managing license numbers
- Software maintenance, renewals and upgrade rights
- Liability for any unlicensed applications being used
- Unauthorized use or distribution of license
- Removing applications from obsolete machines
- Duplicating software
- Training
- Accounting

### 1.7 Shopping and Ordering Information

All current prices are listed in the on-line catalog at [www.edbuy.org](http://www.edbuy.org) as of June 20, 2005.

All purchase orders MUST BE FAXED to the EdBuy clearinghouse at 800-606-6148 in order to get the contract price and to ensure bid protection.

Purchase orders should be made out to: Digital Information Services, 10425 Dalebrooke Lane, Potomac, MD 20854, but must be faxed to 800-606-6148.

The vendor contract manager is John Bowers, who can be reached by e-mail at [john@ciacentral.com](mailto:john@ciacentral.com), by phone at (301) 762-1051 or by fax at (301) 762-6719.

## Procurement Bulletin 05-03

Any district that is an Epylon client can see the Microsoft contract on line, create a requisition, get approvals, encumber funds, and submit the purchase order on line instead of using paper or the fax process.

### 2.0 What is EdBuy?

EdBuy is a cooperative purchasing program operated by the California County Superintendents Educational Services Association (CCSESA) based in Sacramento. In EdBuy's initial offering, twenty county offices of Education signed up to support the EdBuy/LACOE bids, participate in the EdBuy program and to use EdBuy contracts. Any County Office of Education or District wishing to participate and support future bids can sign a non-binding letter of participation which can be downloaded from [www.edbuy.org](http://www.edbuy.org) or ask for a letter from Epylon Corporation. However, any County Office of Education or District in the state can purchase off the contracts regardless whether or not they have signed a participation letter. EdBuy works with a lead County Office of Education or school district to go to bid on behalf of both County Offices of Education and districts. The program uses the industry's proven practices to obtain best value pricing on a wide range of commodities. In addition, we provide several value-added services by asking users to fax their purchase orders (POs) to our clearinghouse. For example, we check for errors on the PO, and we record line item data so we can give users periodic purchasing reports. Finally, we electronically forward the PO to the proper vendor, while monitoring the vendor's compliance with the contract.

### 2.1 Is there a cost to participate?

There is no cost to participate or use the contracts. The contracts are a service of your local participating County Office of Education, working cooperatively with other County Offices of Education. Unlike CMAS, which now charges users 2.57 percent of the value of each purchase order, EdBuy contracts are free to use.

### 2.3 Bid Documentation

Bid documentation (including proof of advertisement and terms and conditions) can be found by clicking on the hyperlink corresponding to any line item brought up by the search functionality of EdBuy.org. In addition, a hyperlink to documentation is located alongside the contract name in the contracts listing section of [www.edbuy.org](http://www.edbuy.org).
